Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 14 and 15 are rejected under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 14 and 15 contain limitations drawn to molecular weight and glass transition temperature that fail to further limit claim 4 and 6.

Claim Rejections - 35 USC § 102/103

The following is a quotation of 35 U.S.C. 103(a) and 102(b) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 4-8, 10-12, and 16-20 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Heine ('064). Heine teaches a fiber reinforced thermosetting polyurethane composition comprising the reaction product of polyol and polyisocyanate (Abstract; col 1 lines 9-11; col 3 lines 8-24). In particular patentee teaches that the composition may contain up to 75% by weight of polypropylene glycol, which has an average molecular weight ranging from 62 to 400,

Art Unit: 1796

and the polyisocyanate is present relative to the polyol in a NCO:OH ratio of 0.9:1 to 1.1:1 (col 3 lines 18-21, 22-24; col 4 lines 21-28; col 6 lines 16, 27-28).

3. Regarding the claimed amounts of fibrous material, Heine explains that said material may be present by 20 to 90% by weight based on the total composition, and although this is not in terms of volume percentage, based on the breadth of the disclosed and claimed ranges, the position is taken that Heine inherently satisfies the claimed range (Col 3 lines 14-16). Regarding the method of claims 6, and 20, as well as the "shape memory" limitation, patentee explains the fibrous material is impregnated with an uncured polyurethane resin, which is then cured. The resulting polyurethane can then be reheated thereby allowing the polyurethane to be reshaped (Col 7 lines 45-62, 67-68; col 8 lines 1-5).

4. Finally, it is noted that Heine is silent in disclosing the glass transition temperatures of the resulting polyurethane, nevertheless when the prior art discloses a product which reasonably appears to be either identical with or only slightly different than a product claimed in a product-by-process claim it is appropriate for the examiner to make a rejection under both the applicable section of 35 U.S.C. 102 and 35 U.S.C. 103 such that the burden is shifted to applicant to provide clear and convincing factual evidence that the respective products do in fact differ in kind. *In re Brown*, 59 CCPA 1063, 173 USPQ 685 (1972); *In re Fessman*, 180 USPQ 324 (CCPA 1974).

Response to Arguments

5. Applicant's arguments with respect to claims 4-12, 14-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Art Unit: 1796

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

7. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **BENJAMIN J. GILLESPIE** whose telephone number is (571)272-2472.
